

THE ENFYYS

77

Yeaah

When a master started to settle accounts with his slaves, a man's brought in
who owed him 10,000 talents when he told him he was
broken his master ordered him to sell his wife and all the things
to make payment as fast as he can

So the slave fell down and did obeisance to him
"Be patient with me, and I'll pay back everything"
Moved with pity at this, the master let him off and canceled his debt

I always wonder after someone has done something bad to me
What is right, how many times shall I forgive him?
Two times? Four times? Or is up to seven times enough?
But the answer is not up to seven, but up to 77

Woohoo

The slave found one of his fellows, who owed him 100 talents
He grabbed and threatened "pay back whatever you owe"
His fellow slave fell down and started to beg him
"Be patient with me, and I'll pay you back – as much as I can"
However, he was not willing, he had him thrown into prison

I always wonder after someone has done something bad to me
What is right, how many times shall I forgive him?
Two times? Four times? Or is up to seven times enough?
But the answer is not up to seven, but up to 77

Then his master summoned him and said to him:
'Wicked slave, I canceled all the debt for you when you pleaded with me
Should you not also have shown mercy to your fellow slave as I showed mercy to you?
And he handed him over to the jailers until he repaid all that he owed

I always wonder after someone has done something bad to me
What is right, how many times shall I forgive him?
Two times? Four times? Or is up to seven times enough?
But the answer is not up to seven, but up to 77

I always wonder after someone has done something bad to me
What is right, how many times shall I forgive him?
Two times? Four times? Or is up to seven times enough?
But the answer is not up to seven, but up to 77
